

# Bagasse

*Bagasse products are made from sugarcane fiber remaining after extraction of juice from the sugarcane. Sugarcane is not only a readily renewable resource, but the sugarcane fiber can be turned into products normally made from plastic and paper.*

- 🌍 Microwave and freezer safe
- 🌍 Approximate Home Composting Time: 60-80 days
- 🌍 Approximate Commercial Composting Time: 30-90 days
- 🌍 Soak proof, have no plastic or wax lining applied to it and can be used for both hot (up to 200°F) and cold items
